

Katana®

A non-selective residual herbicide for total weed control on amenity vegetation (around), natural surfaces not intended to bear vegetation, permeable surfaces overlying soil, and hard surfaces (railway ballast only)

Katana in action

Before

After

Benefits of Katana

Katana's broad spectrum of activity delivers a long period of residual control of both broad leaved weeds and grasses which offers local authorities and contractors a positive way of reducing costs, whilst still maintaining effective weed control.

- Low application rate
- Low environmental risk
- Excellent efficacy in controlling weeds/grasses
- Can be applied at anytime of year
- Full product support
- On-site training available if required

Formulation	A water dispersible granule formulation containing 25% w/w flazasulfuron				
Crops	Amenity vegetation (around), natural surfaces not intended to bear vegetation, permeable surfaces overlying soil, and hard surfaces (railway ballast only)				
Equipment	Knapsack fitted with a 1 bar flow regulator + AN 0.6 deflector nozzle				
Applications	1 application per calendar year				
Dose Rate	150g/h	Water Volume	150L/ha	Timing	Early to late Spring
